RobotX22 Team Time _ Zoom Chat (Edited)

16:18:16   From Autonomy at RoboNation : Please be sure that your contact information in the registration form is correct. We will be sending the email to the generic email address and to the Primary and Secondary POCs' email addresses.

16:20:29   From Felipe Felbol | Caleuche : Do we need to do a fumigation to the original wam-v crate?

16:23:28   From Autonomy at RoboNation : Hi Felipe, Have you contacted TGL? They should be able to answer your question.

16:25:20   From Felipe Felbol | Caleuche : We already contacted TGL, thanks

16:28:27   From Felipe Felbol | Caleuche To Autonomy at RoboNation(privately) : I think they will be able, i just wanted to know if you had any other information.
I will ask jack directly
Thank you very much

16:31:06   From Autonomy at RoboNation To Felipe Felbol | Caleuche(privately) : Thanks for your response, Felipe! I'm pretty sure Jack will be able to answer your question. If not, feel free to contact us at autonomy@robonation.org.

16:24:34   From Julianna | RoboNation : https://www.onlinevisaaustralia.org/eta/

16:23:05   From Jorge GTMR : Would we need a letter from Robotx in the VISA process?

16:25:44   From Autonomy at RoboNation : If you need a letter of invitation, fill in the Invitation Letter Information task in the registration portal. Fill in the information for each team member for whom you'll need a visa.

16:28:03   From Jorge GTMR To Autonomy at RoboNation(privately) : Thank you I will do so. Any contact email for extra questions about the invitation letter, in case there are more?

16:29:55   From Autonomy at RoboNation To Jorge GTMR(privately) : Hello Jorge. You can email autonomy@robonation.org. Now that we're done with our RoboBoat and RoboSub competitions, we'll be a lot more responsive.

16:29:34   From Alex Perez | NaviGator UF : This can be a question for later, but are scoring for each of the tasks available? I didn't see it on the current documentation.

16:31:39   From alex szeto - Inspiration : can you tell more about background check for minor?

16:32:36   From Colin Szeto | Team Inspiration : Does anyone have their blog public on their website? What information are you putting on there, testing reports, daily progress, build processes, etc?

16:32:38   From alex szeto - Inspiration : thanks

16:32:39   From Alex Perez | NaviGator UF : Side note on the competition scoring (i know it is still in progress), but will completion time be a part of the scoring process like with VRX? Its okay if it is not known yet.

16:33:09   From Edoardo Sarda : Can you post the link for lodging info here?

16:33:24   From Julianna | RoboNation : https://robotx.org/student-housing

16:33:46   From Sean Fish | GTMRG : Our team is working on a ReadTheDocs style wiki @Colin

16:35:33   From Abigail Wicks | Flinders University | Australis^2 : 4.2.2 point 4 says that all lipo batteries must have cell level safety and balancing circuits. Does this apply to small batteries used in remotes? is there a voltage limit to where this rule applies as we assumed that it only applies for the larger battery systems

16:37:15   From Duane | TeamQUT : With the Wildlife Encounter Task, what is meant by avoiding the crocodile? Do you need to stay away from it or just don't do any manoeuvres around it?

16:43:13   From Abigail Wicks | Flinders University | Australis^2 : Thank you

16:44:02   From Autonomy at RoboNation : We encourage teams to use RobotX BAND to share BLOGS/VLOGS, questions, status, etc. Remember also to regularly check RobotX Forum.

16:44:06   From Duane | TeamQUT : ok thanks

16:45:06   From Autonomy at RoboNation : We have a lot of new teams (and returning teams) who could use BAND as a collaboration tool.

16:49:24   From Amadeus Aristo Winarto : Hi. For the follow the path task, the buoys are depicted in the example such that the red buoys are always to the left of green buoys. Will this be the case in the actual competition, or can the colors be swapped i.e left is green of red? Also do we have additional details on the gates e.g. Width, minimum distance between gates etc?

16:51:15   From Lee Chan Wai | Bumblebee : when will the new edition of the handbook be released? Thank you!

16:54:31   From Amadeus Aristo Winarto : Also for task 1, the handbook says that "teams are provided with a wired RJ45 connection" for communication with the TD network. May I know what the other end of the RJ45 be? Whether it will be a laptop or router or?

16:55:38   From Julianna | RoboNation : As Aamir just mentioned, it will be connected to a router!
