

RobotX 2024: Community & Outreach Submission
Nanyang Technological University - NTU

In recent months, we have organised engaging lab tours and insightful sharing sessions for students, educators, and ministers from Singapore to countries including Thailand, Bhutan, and China, to showcase our AMS project. Our goal is to inspire the next generation of engineers and innovators by providing hands-on insights into our work.

Additionally, we have actively updated our LinkedIn platform to increase visibility, raise awareness, and engage with potential candidates who are passionate about joining our mission.

27 May - Hwa Chong Institution, Singapore (students)
