Bayou Bot Krewe

Community and Outreach

During the summer, 3 of the team's members participated in the Pioneering Louisiana's Future expo. This was a presentation from the university demonstrating the current progress of research in the field of engineering. This expo was for Louisiana government officials and industry partners. The team presented work that was completed during the summer as part of the main tech presentation done toward the end of the overall expo. The team also presented at an Innovation Showcase held in Madison Hall on the ULL campus. This was a joint presentation of research done between the engineering, physics, geology, and other departments. This was also done as an industry and government event, with open admissions for anyone interested. This was done in September of 2026.
