

Community & Outreach Description

The Barelang MRT team is a new team designed not only to competition but also to research marine technologies that the research would hopefully help the local community, the Barelang MRT team will actively introduce research to the community while conducting off-campus robot trials. The Barelang MRT team also followed an innovative product exhibition staged by the campus and opened to the public to introduce what ASV (Autonomous Surface Vehicles) is to the community that comes through the exhibit.

The Barelang MRT team also motivated college student inside the campus by creating a sharing session, and in it the team presented research to all college student, hopefully generating student interest in robot and ship technology and will continue the research with the Barelang MRT team.
