

RoboBoat 2023

Arab Academy for Science, Technology & Maritime Transport

Abydos Marine

Community & Outreach Submission

We set up pop-up booths in our university and had a fantastic engagement. We hung some posters so more people would know about the competition. We made a small-scale ship design competition for students to inspire and brainstorm our new ASV final design.

Many people expressed their interest in joining our team in next the roboboat season. As this is our first year, we were super excited.
