

The MHS Seals have taken numerous opportunities throughout the year to advertise the RoboBoat club and spark an interest in the future minds of our team. Our latest outreach endeavor was just last weekend, advertising the MHS Seals to underclassmen and junior high students at a STEM open house. We displayed our past designs and had digital content to share to interested students and parents who were fascinated by the many components of the MHS Seals.

On top of our most recent open house, the MHS Seals reached out to our community with alternative efforts such as booth set ups at the Martin High School's yearly club showcasing, First Event. We have also deployed representatives from our team to speak to elementary and junior high students in the past. Additionally, we have continuously advertised RoboBoat through the STEM Academy Newsletter, educational Lunch & Learns, and club fundraisers.
