

## **Delhi Technological University**

### **Community and Outreach**

Each year DTU AUV attends and organizes many workshops to reach out to the community. Through these exhibitions, DTU-AUV tries to reach young and insightful minds to take up robotics. The team organized a Machine Learning and Artificial Intelligence Workshop. The program implemented a well-researched plan to spread AI talent at global tech hubs for applications in practical decision-making. In this workshop, the basics of modern AI, as well as some of the representative applications of Artificial Intelligence, were covered.

The team believes in spreading awareness about what advancements are taking place in the fields of science and technology. Every year we conduct several school workshops to promote such activities and also give school students a sight of exactly what kind of environment they face when they go for higher studies. We have organized workshops in collaboration with NGOs to provide an opportunity to students with limited means to develop a knack for science and enhance their problem-solving abilities, analytical thinking, and practical skills to support their intellectual growth.
