

RoboSub 2023

Optional Community & Outreach Submission

School/Organization Name: Duke University
Team Name: Duke Robotics Clu
Generic Team E-mail: hello@duke-robotics.com
Submission Date: February 4, 2023

Community & Outreach Submission

A key objective of the RoboSub program is to strengthen and enhance the community. Teams are encouraged to participate in educational outreach activities and describe those activities here. Maximum 500 words

Community & Outreach Description:

Following the pandemic, we continue our love of showing robotics to younger generations. As of 2023, we share our workspace with a high school robotics team as we collaborate, share resources, and learn together. This gives our members direct opportunities to provide guidance and expertise to the younger students, creating a community beyond just the Duke community. Club members Michael Bryant, Lilly Chiavetta, Morgan Chu, and Rishi Rao are official mentors of FRC team 8429, Valence Robotics. This spring, these mentors, along with Duke Professor Rabih Yones, accompanied the high schoolers to their district and state competitions. Read more about the team here, on Duke Engineering's webpage.

Additionally here is a link to an video with more information on our outreach: <https://youtu.be/KS5FmeH8G5Q>
