

ROBOSUB 2025

Autonomous Maritime Robotics Association at Embry-Riddle Aeronautical University
Team Unsinkable

Community & Outreach Description

Team Unsinkable was able to connect with the community by sharing out love for robotics by volunteering as judges at the state and regional FLL Competitions. The Theme for this year was tied to underwater exploration and unmanned underwater vehicles. All of our team members had a great time connecting with young people and teaching them about what we do, and helping them in their own robotics journeys. Vv.
