

ROBOSUB 2025

Indian Institute of Technology, Bombay
AUV-IITB

Community & Outreach Description

AUV-IITB actively partakes in community and outreach initiatives, engaging with the public through annual workshops and exhibitions designed to spark curiosity and inspire young minds in the world of robotics. These events showcase the capabilities of our AUVs and feature seminars aimed at deepening understanding and igniting interest. We cherish every opportunity to connect with the community and share our passion for underwater robotics.

Our outreach efforts include the Technology Awareness Session at Hiware Bazar and our participation in IIT Bombay's WISE program, where we present our AUV to aspiring young scientists. The Matsya101 Instagram series brings complex AUV concepts to life through engaging visuals and accessible explanations. Sessions with children are especially joyful and interactive—one memorable example being our workshop on March 5, 2023, where schoolchildren took part in hands-on activities and watched a live demonstration of Matsya 6 with wide-eyed excitement.
