

App B – Fact Sheet

Creative Birds – White Pine Stem Academy – Idaho Falls, ID

Our ROV pictured below

Competing in Middle School Stock Class

We used a utility ROV with a back scratcher for our design this year. This is the same setup we used last year and it worked very well for us.

This is the second year in Seaperch for most of our team except Tre, it was his third year doing it.

Our team has competed in the international competition once before, if we return this year it will our second year to do so.

Our Seaperch design is unique because its based on our design from last year that we won the regional competition with. Based on this we feel we could be very successful this year again, which we feel no other school in the region could say.

Our biggest takeaway this season was to focus on having fun and being a team. We found when we worked together we were able to address any issues we ran into this year.
