## StingRay Apollo

### SeaPerch Design Overview:

Our design, throughout the year, has changed drastically. Currently our design is a callback to one of our models from last year's competition.

2 Years participating in SeaPerch

1 Times at the International SeaPerch Challenge

### Our SeaPerch is unique because:

We have integrated our previous models from last year into our current model. We have also painted our ROV's hook for personalization.

### Our biggest takeaway this season is:

The value of organization and being on schedule. We have had to deal with the transition into our last year of high school, our personal endeavors, and working on robotics. It has been hard to keep track of everything. We have learned that with all we have going on, we should plan and execute our objectives in a manner that does not disrupt our other goals.
