WET TECHS: HIGH SCHOOL STOCK CLASS

Years Competed
Madison Williams: 4 years
Logan Killingsworth: 2 years
As a team: 2 years

This is Team Wet Techs 1st Year at the International Competition.

Design overview: Team Wet Techs 2024 Seaperch design is stable and effective when it comes to competing the mission course. Likewise, it is also fast and maneuverable for an adequate completion time during the obstacle course.

Our SeaPerch is unique because it has an arm designed for an easier completion of tasks during the mission course.

Our biggest takeaway this season is, if it can go wrong, it will go wrong. We have noticed that it is an important priority to take effective counter measures against any and every possible problem.
